**Subject:** Microsoft Settlement

I would just like to say that the settlement offered by the 9 states and the DOJ is wholly inadequate to solve the Monopoly Microsoft holds on the software market. Unless there is something done to level the playing field and penalize Microsoft for what it has unlawful gained, then what is the whole point of this trail? Nothing in that settlement accomplished this. I do feel the remaining 9 states settlement offer is a more substantial remedy.

Rather than go into great detail, I refer to the following articles, which I feel speak from my personal perspective:
